English

---

Dungend Defenders is a tower defender game. Its rely fun game and worth your time.. this is halloween this is halloween halloween halloween...it's from the movie the nightmare before defenders ok lets get to the point this is a good pack it has good skins for the 4 main heros i like it but i go it on sale for idk i got the game with all the dlc for 5 bucks anyway i would get it in the pack when it is on sale. Nice new costumes and just for one Euro? I think it's totally worth it for the price of one beer :) 8V10. this one is really awesome. not worth it. These costumes for your characters are classy and well done. They are very creative and fun to look at. They have style that fits the game perfectly. This DLC doesn't give you any advantage to the game at all, it is just for looks. If you like how they look in the photos then get this DLC because then you will like them in game and it will bring variety to the game. The cool thing about costumes in the game is that you can change them when you want and don't have to stick with having one skin to look at all the time. I have really enjoyed having these costumes for my characters and having the option to change when I see fit. If you enjoy this game and want to add some flair to the game then this is the DLC to pick up. If you get it I know you wont regret it because you can always customize the colors of the costume as well to make it more unique.
