

The Kentec Loop Explorer is a visual program designed to help beginner and experienced users learn the basics of the Kentec Loops. This software helps students understand how loops work, as well as how to build their own loops from scratch. The last module of the software allows you to create a full song from scratch without any loops or instruments, finally giving you an idea of what it's like to produce electronic music with your own machine. If you're precocious and think that learning music production on a computer is too basic for your skill set, then this is not for you. If you're a beginner, this is a great program to help you learn the basics of music production, especially with the mixer module. Options: Kenton Trax Trax Vol. 2 is a set of ten Traktor Scratch-ready loops from various artists from Kenton Trax Records. The 10 drum kits are all 100 BPM and include an expected amount of fills and variation, making them useful for beatmakers looking to expand their sound. However, if you feel like you've already got plenty of quality drum sounds for your tracks already, then these 10 loops won't be worth your time. Vol. 1 is not nearly as exciting as Vol. 2, but it still has some usable sounds if you can get past the dry, uninspired nature of the pack.

*Mastered Trax are un-mastered versions of the Trax Vol's 1 and 2.

* Bootlegs are unofficial mixes made by fans that correlate with Kenton Trax records, but they are not official releases by Kenton Trax Records.

All available for free download on Soundcloud except "Underground" which is only available on Juno Records' website.

Also available for download on Juno Records' website.

Also available for free download on Juno Records's website.
