Pretty good, reminds me of dynasty warrior in VR.. I was amuzed, but very shortly because it's quite a shallow game. I'd say it was a tablet game if not for the price.

Pick it up in a steam sale, I'd say.. So far it's pretty good! I love the humor and innuendos. It's great that it's educational and fun. A bit of platforming is nice too. Devs seem very responsive to community wishes. Love that the game makes you feel like your choices matter (haven't replayed to see if it feels the same then too). The world is very beautiful too imho with night and day changes. Looking forward to seeing where this game goes! Seems like it's breaking new grounds for it's genre. Planning to come back and write a longer more detailed reviews once I've experienced more of the game. So far only experienced one bug though! We (my daughter and I) enjoy it and think you will too :) Unless you are not a fan of EAs then just wait for commercial release, either way Have a wonderful day and happy gaming!! :). I love adventure games but dont often make it all the way to the end. This fun game kept me entertained all the way through. The humor and style of the entire game screamed cheesy video game comedy.. Pro: Interesting concept about work and money.

This game this you how to make money.

Con: Magic did not get explained fully. Some boss one hit KO you.
Eventhough This game said no griding it is actually need grinding and a lot of luck.
I finished the game at LV60. All the book fully read. So it is grinding.

. They shouldda called it 'cyberpunk asteroids, with cops'.

Thats what you're getting here. it's funish, but I can only play for like 10 minutes at a time before I'm thinking about big boy games.

Many achievements that are relatively easy to get.

6.5/10 spicy bois

Rec. price: \$1. Waste of time and money! If you want a simulator this ain't the game!. Awesome Game, shame that it's a buggy mess, It's not even patched to the latest version.. I love story based alchemy games with dark themes.

This game is amazing.

It reminds me of Animamundi Dark but more accessible to casual players!

Love this game!!!

. Wonderful cute game, much like the other in Clarus Victoria. NOT a sandbox game so to beat it you better learn some history (though it IS possible to 'beat' history). Graphics are a step up from previous iterations - not that that matters too much. Music as always wel conceived. It's almost like a quite detailed boardgame. It took me a few go's to beat the very, very touch 'ending'. For those expecting a true Sandbox game - it's not like that. Your only (but wonderful) reward is to really learn the impact of your

choices, device long term strategies and get to know Egypt. It's tough, it's beautiful. Cannot wait for Middle Kingdom :).

Movement is painfully slow now, but added some of the coolest weapons to the series.. xbox memories. Good puzzle game but no option to exit.. This game is amazing. If you are a fan of vaporwave and its aesthetics, you will enjoy this game. Although you will most likely get through it pretty quickly, I feel as though the ~8 hours the game will take is worth it.. This is my first choice of game that I've played. I thoroughly enjoyed it with my first playthrough and I think the choice driven storyline is fantastic. Multiple storyline endings with strong narratives.. I didn't get very far in this game, the menu was bugged so I could only see half of it, there are a lot of problems with collision detections and clipping, the graphics are awful and not in an artistically primitive way, there is no music and I didn't understand how the battle system worked so it was pot luck whether I died or not.. why was this not in the game in the beginning ?. Galaxy Reavers, good or bad game?

The game is very entertaining to play and fun for a couple of hours. The game have two currencies, a primary and secondary currency. The main currency is gold, gold is the ingame standard currency you can purchase new ships and items with. The secondary currency is Khorium, this is the real money currency, this currency seems to have no role in the PC version though you are collection it through emissions..

So way two currencies, well first i played this game on my phone and in the phone version you can purchase ships and items for khorium as well gold. You can still collect Khorium playing the game and watching advertisement or buy lots of it for a not too pricey price.

So yes there is two version of the game.

Personally i say Galaxy Reavers is more suited for an mobile or tablet then the pc because the resolution and the GUI scale. But the game is much, much cheaper here on steam.

Purchasing the game on steam with DLCs is like purchasing the ingame items on the mobile or tablet version but cheaper.

I like this game, it's fun to play and have good atmosphere around is. But at the current stage of the game i can't say i can recommend this game, especially if you have more copies of the game. :). Ah, the memories. The first in the Full Spectrum Warrior series and it is a pretty fun game. Less hardcore than the second but still very strategic. Command 2-3 squads depending on the missions. Command, point fire, suppress, flank, eliminate enemy, the basics of the game. Shows you how soldiers perform on the battlefield. It's a pretty fun overall game. The story is not as intense as the second one but still a pretty good story. This game is just too much fun. It is faster than the second and very playable. The tactics is just so much fun!!!! You better own it! 9.5/10!!! Get it!!!!!!!. Update: Since it's been quite awhile since I submitted my last review, though troubled by the onslaught of bugs, hassle, frustration and to who would have guessed, had fun would be all bundled nicely.. I HAVE tried to work every flaw and enjoy the game.. But what game to enjoy that's just as bare as when I last played it last. You can add more content; but it's bare bones if that doesn't draw you like it feels like it's important.. Food.. Yeah hit or miss out the game. Have fun, maybe next year.
